Photographic Weighbridge Tickets for your Scrap Metal

2 Recycling Limited sets the standards that others follow when it comes to the handling and traceable paperwork trail for your scrap metals.

2 Recycling's 'Photographic Weighbridge Tickets' help give unparalleled traceability, along with a unique bin tracking system and detailed material valuation summaries. We truly believe that 2 Recycling Ltd supply the best audit trail system in the industry.

Linking up with Wogaard is further evidence that both companies are committed to working with their customers to help reduce their coolant costs, whilst at the same time ensuring they are receiving the best possible market price for their scrap metals.

All producers of swarf have a Duty of Care to ensure that the waste (swarf) is described accurately. With too much moisture in the swarf it will have to be treated as a hazardous Waste stream. What better way to clean up your swarf than using a Wogaard coolant saver in your bins of scrap swarf.

The WOGAARD Coolant Saver is easy to install and virtually maintenance free. With a list price in the low hundreds per unit, payback times are usually well under 12 months and often much sooner. Help yourself save money and have compliant waste streams.

Talk to us about integrating the WOGAARD Coolant Saver into your scrap metal collections
